Hi, I think this lab is close, but there seems to be an error and I do not know what it is. I hit the check button, so if anyone in the class, the professor or teaching assistants are able to have a look, it should be visible to you now. Thank you very much for your help the past few days with errors like these, usually syntax errors, but this time, I'm not sure, since I thought I got the wire renaming correct. Thank you - still trying to finish the class on time, and I just started week 6, and still have weeks 7 and 8 to go before May 12th! Thanks.
